- Population migration to other cities
- Decreased resident confidence
- Widening gap between code enforcement requests and response
- Neighborhoods and businesses being developed in outlying areas with inadequate infrastructure
- Inability to meet the demand for infrastructure
- Inefficient delivery of core services

Strategies to address the Long-Term Issue

- Continue to improve Intelligence-Led policing.
- Continue the planning and construction of new fire stations authorized as General Obligation Bond projects.
- Monitor the health indices related to cardiac outcomes.
- Monitor the number of times the availability of EMSA resources is at level zero.
- Promote inner-city residential and business development and redevelopment through the use of incentives, design review consultations and coordination with other City agencies and the development community.
- Strategically concentrate neighborhood revitalization efforts in the Strong Neighborhoods Initiative area to reverse neighborhood decline early and leverage private investment.
- Stabilize at risk neighborhoods through the Strong Neighborhood Initiative to make neighborhoods more attractive for single family residential development.
- Implement the Neighborhood Stabilization Program to purchase and rehabilitate foreclosed single-family bank owned properties for the benefit of low/moderate/medium income families.
- Reduce the number of abandoned buildings by increasing the number of property maintenance citations
